

Features

- High air volume, low noise
- Lightweight design
- High efficiency and energy saving
- Easy maintenance
- Controlador: Manual control

Parameter Information

Maximum Airflow:	4000 CFM
Sound Pressure:	80 dB
Product Weight:	38.05 lbs
Product Dimensions:	18.6 × 16 × 20.2 in
Operating Voltag:	110V-120V,60Hz 224W
Power Cord:	20 ft
Temperature Range:	23-160 °F
Functioning Humidity Range:	≤98%

PRODUCT APPLICATION

The GE4000TC is a high-performance, versatile blower for a wide range of industrial and commercial applications. Its unique design and advanced technology enable it to meet the needs of customers in different scenarios.

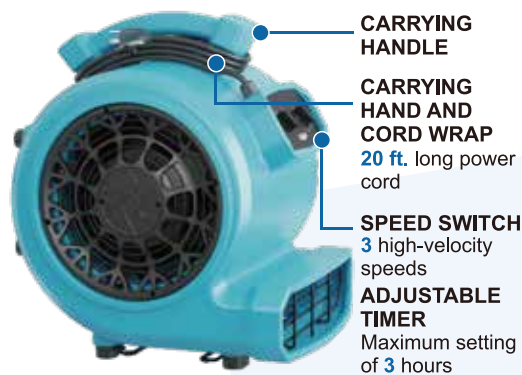

The snail fan GE4000TC is equipped with a timer function to set the working time for up to three hours. This function allows users to precisely control the running time of the fan, so as to meet specific application needs, the unique design of the carpet mouth of the snail fan GE4000TC can effectively prevent dust and debris from entering the fan, thereby extending the service life of the fan.

The carpet mouth is soft and durable and can be tightly fitted to the ground to ensure the sealing of the fan. Timer operation is simple and easy to use, the user only needs to follow the instructions in the manual to set up. In places where regular ventilation or exhaust is required, such as laboratories, warehouses, workshops, etc., the timer function can ensure that the fan automatically runs within the set time and improve work efficiency. For occasions where intermittent operation is required, the timer function can reduce manual intervention and reduce operating costs.

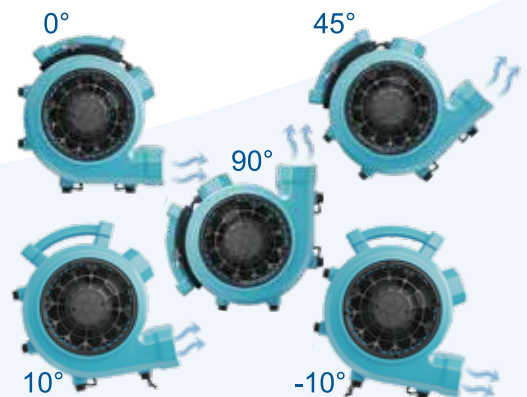

KEY DESIGN FEATURES

- 3H timer
- 3-Speed adjustable airflow
- Stackable
- 20 ft Power cord
- Blow at four angles
