

PureCare 780S

Single-Side Air Filtration System

SPECIFICATIONS

Features	
More air volume	✓
Durable and efficient operation	✓
Easy to pull out to replace the filter	✓
Composite double-effect filter system	✓
The housing is made of stainless steel	✓
Built-in wire	✓
Low noise	✓
1-2 Hours timer	✓
Carry extra outlets	✓
2 Level of air speed	✓

Parameter Information	
Operating voltage	115 V
Breaker	8 Amps
Noise decibels	58 dB
Fan air volume	580 CFM - 780 CFM
Product net weight	17.4 lbs
Package size	14.57 X 9.45 X 11.81 in
Filter specifications	MERV-13
Recommended Operating Temperature	20-104 °F

PRODUCT APPLICATION

The PureCare 780S is a suspension single-side air intake filtration system for woodworking garages and factory floors. It has a powerful but low-noise vortex fan and an efficient MERV-13 filter for dust, small particles, and odors. The system has a built-in powered vortex fan that delivers up to 780CFM of air, enough to clean up to 800 square feet of space, and has two wind speeds of 580CFM/780CFM, which can be easily switched by the user through the control panel. The PureCare 780S is compact and lightweight, weighing just 17.4 pounds, and comes with a top handle for easy transfer and storage. In addition, the control panel is simple to use, supports wind speed switching and timer setting, and the auxiliary socket below can connect other PureCare devices such as the Purecare 1050 vacuum cleaner so that multiple devices can work simultaneously without worrying about the length of the power cord.
